**Building a Legacy™**  
*Small Products Making a Big Impact*

ST. LOUIS, MO – Leading food ingredient manufacturer and distributor, International Food Products Corporation, IFPC, is proud to announce the launch of a new brand of products produced at its manufacturing plant, IFPC Aviator. The banner brand Legacy™ proudly clads the packaging of our proprietary manufactured food ingredient blends produced exclusively for IFPC customers.

The first line of Legacy™ products, aptly named Legacy™SWEET, are a complete assortment of sweetener ingredient blends, including sucralose, sugar replacers, and sugar reducers. The Legacy™SWEET ingredients are adaptable to virtually all products. The unique and most beneficial part about the Legacy™SWEET products is they may be easily converted into a custom blend made solely for any one of our customers' products.

"We are excited to showcase Aviator, our manufacturing plant, and the trendsetting ingredients we manufacture with IFPC's new brand, Legacy™," said Jamie Moritz, General Manager of IFPC. "The ingredients in the Legacy™ and Legacy™SWEET brands are designed to help our customers get their new products to shelf faster and with greater ease."

Legacy™ products are available exclusively from IFPC. Orders and inquiries may be made by emailing [info@ifpc.com](mailto:info@ifpc.com).

### **About International Food Products Corporation - IFPC**

Since 1974, the Brown family has grown their family owned business from a sugar supplier to a full service ingredient manufacturer and distributor. IFPC partners with brands across dairies, food and beverage manufacturers, and food service industries, supplying quality ingredients, creating custom solutions, and providing expert advice. Our goal is to create the best products for our customers to ensure their business is successful.
